

Ernie

Safetags™ Safetag™ Professional Identification

Ernest “Ernie” Amory Codman was a visionary in healthcare, a pioneer in demanding that hospitals track detailed patient outcomes, creating the “End Result System,” a revolutionary method that today guarantees safety and traceability in medical care.

Safetag™ Pockets help improve visibility and communication in medical settings, making it easier and faster to identify roles in such a dynamic environment as a hospital or clinic. But above all, they are a recognition of all those who, through their work, make health care a true priority.
